Coronavirus and Visiting Swan's Island

- Post on behalf of the Town Office

To those of you with homes on Swan's Island, who might be considering coming to the island to get away from large population centers where the virus is likely to be more prevalent; please consider that Swan's Island is not equipped to handle actual Coronavirus cases. Our preference would be that you remain in places where you have direct access to a hospital. If you do come to the Island, please do your best to prepare for an extended stay and the Town would ask that you be prepared to self-quarantine for a 2-week period.
